SPARK Forms Builder supports creating multilingual smart forms!

This video will show you how **SPARK** forms support multilingual features for all SharePoint languages with RTL-LTR directions. Just design the form in the primary language, select the form's other languages that you desire, update controls properties, translate the forms labels and custom messages accordingly, and you will have multilingual forms up and running in a matter of minutes. **Watch it now!**

How to use SQL Connector in SPARK Forms Builder!!

This video will show you how you can add SQL connector control to your **SPARK** form and integrate it with external databases directly without the need to use SharePoint BCS, this video will also show you how to configure the control to retrieve data from external databases and mapping the retrieved data to multiple controls in your form at runtime in less than 5 minutes easily, professionally and efficiently.

About SPARK

You can download its brochure from this link: SPARK Brochure

This new letter contains a breif description on how to creat a multilingual smart forms, multi-views (wizard like) forms and how to use SQL connector control to retreive data from external database without the need to configure BCS on your farm.

Forms Builder For SharePoint

How to create multi-views (Wizard Like) form using SPARK Forms Builder!!

This video will show you how to create a multiviews (Wizard Like) form using panels, JS and SPARK Forms Builder's internal functions. Using this technique will enable the designers to easily create a multi-views, paging and wizard forms for their users, all in a one single integrated page. The form performance will be amazing as there is no special code to shifting the panels when showing and hiding them as this technique depends on the HTML objects properties and their default behavior in the browsers. Watch it now!

SPARK Community – (How To) Videos

Many new videos have been added to **SPARK** community web site since it was published online, the new (How To) videos will provide SPARK users with intensive knowledge about how to use its controls, functions, rules and code to create a responsive powerful forms for their SharePoint environment for both on premises and Office 365.
